

Transitioning to College **with** **The Real Thing & *More of The Real Thing***

Many students enter college having no idea what will be expected of them. **The Real Thing** and ***More of The Real Thing*** are unique skill-building DVDs, books (and/or licensable print support) that prepare students for the realities of college.

The program assists students trying to bridge the gap between behaviors appropriate in high schools, adult schools, and in other countries that often run counter to the demands of the American college classroom.

The Real Thing and ***More of The Real Thing*** provide contextualized examples of authentic college classrooms. They teach students how to ask questions, develop intellectual curiosity, synthesize ideas and form original opinions.

As a part of students' transition into college and university, **The Real Thing** and ***More of The Real Thing*** show what lies ahead and, most importantly, they provide opportunities to practice the skills vital to students' success.

The Real Thing and ***More of The Real Thing*** are used by thousands of students in the U.S., Europe, Canada, the Middle East and China.
